Software

Maya ~ Photoshop ~ Nuke~ ShotGrid

About

I am a senior visual effects artist with 18 years industry experience working across the globe. I specialize in Layout/Previs and hard surface modeling using Maya, Nuke, Shotgrid and Unreal. I thrive in a creative team. My mature seasoned approach to a project is bolstered by my cheery disposition and positive attitude.

Working closely with supervisors/directors and other artists is a real privilege, always remembering every day is a school day. I can adapt to a pipeline efficiently. I have exemplary communication skills and working remotely with my excellent set up is part of my strong forte. My appreciation for scheduling results in hitting deadlines. Changes and amendments are inevitable, I embrace those.

My versatile career has seen me work in many areas from 3D printing, Advertising, Art installations, Commercials, Documentaries, Feature Films (both VFX and Fully Animated), Mobile Apps, TV shows and Websites.
